MANUAL BYBIT

OXIDO SOLUTIONS

◆ #2 Bitcoin derivates platform

₿ Premium trading signals BTC-USDT

◔ Plug & play

🛡 Trusted & secure

🌴 Passive income

🚢 Less stress and more fun!

STEP 1 A. CREATE MAIN ACCOUNT

By setting up a free Bybit main account through this link, you become eligible for a chance to win exciting prizes on Bybit.

Here's an easy-to-follow path for hassle-free registration:

1 Press the SIGN UP / CLAIM YOUR WELCOME GIFT BUTTON

2 Enter your email address

3 Enter a password & confirm

4 Agree to Bybit's terms and conditions

5 Press the Continue button & confirm you are not from a sanctioned country

6 Make sure your account is at KYC level 2;

otherwise, you will not be able to use our signal service

▶ STEP 1 B. CREATE SUBACCOUNT(S)

To receive buy and sell signals from Oxido Solutions' multi-strategy approach to Bitcoin Perpetual Futures, it's essential to have both a main account and a subaccount. With this setup, one account will receive signals from our ATR algorithm, while the other will receive signals from the Range Maker algorithm.

Here's how you can set up a subaccount:

Ⓧ Mouse over the puppet in the menu and click on subaccount

Ⓧ Press the Create subaccount button & select standard subaccount

Ⓧ Create a username & Press the confirm button

▶ STEP 2. SECURE ACCOUNT

When it comes to security, Bybit has an impeccable reputation. The platform has never been hacked and offers all of the safety tools to help you sleep peacefully. One of them is Two-factor authentication, which can be easily activated:

Download the mobile app of Authy or Google Authenticator

Mouse over the puppet in the menu and then click on Account & Security

Click the Settings button at Google Two Factor and enter the requested email code

Scan the QR code with the Authy or Google Authenticator app

Enter the Authy/GA 2FA code

Confirm

▶ STEP 3 A. DEPOSIT FUNDS

In order to use our signal service, your Bybit account needs to hold sufficient USDT stablecoins. While our free trial only requires USDT 1,000 you need at least USDT 50,000 to enjoy our paid plan. This is how you can fund your Bybit account:

✔ Mouse over the puppet icon in the top menu of Bybit and then click on Assets > Deposit

✔ Do you Have USDT ready to invest? Get your USDT address on Bybit: USDT > Chain: i.e. USDT-MATIC > copy & save

✔ Fiat transfer? Fiat Deposit > Enter amount & Currency (i.e. EUR) > Select Payment method > follow the steps

✔ Do the fiat transfer

✔ Fiat transfer successful? Convert the fiat into USDT

▶️ STEP 3 B. DISTRIBUTE FUNDS

To effectively utilize our signal service, you should evenly distribute the investment amount across the funding wallets of all your (sub)accounts. For example, if you're investing with 100,000 USDT, you should allocate 50,000 USDT to the funding wallet of one (sub)account and 50,000 USDT to the other. Here's how you can do this:

- ⓧ Mouse over the puppet in the menu and then click on Assets > Funding account

- ⓧ Select Transfer Asset next to the appropriate subaccount

- ⓧ Select Across Subaccount(s) > Transfer to Funding wallet(s) > Coin USDT

- ⓧ Enter the amount

Submit

▶ STEP 4. CREATE KEYS

To receive our signals, our trading system must connect with both your main account and any subaccounts. This connection requires two types of keys for each (sub)account: an API key and a corresponding secret key. Here's how you can easily obtain these keys:

👤 Main account: mouse over the puppet in the menu above > click on API > Create new key> Sys-gen API Keys
Subaccount: mouse over the puppet in the menu above > click on subaccounts > API man. > Create new key > Sys-gen API keys

API API key usage: API transaction > Name: enter a name > Add these IPs > API key permissions: read-write

⓪ Permission: select all except USDC, SPOT, Wallet and Assets > Confirm > Enter Google 2FA code > Confirm

✓ Store the API keys and secret keys in a safe spot

✓ Email the keys to administration@oxidosolutions.com

STEP 5. SUBSCRIBE TO OUR SIGNAL SERVICE

	FREE TRIAL	PAID PLAN
Duration	14 days	No limit
Entry	1K USDT	≥ 50K USDT
